

QUALIPOCHE F

Felt bag

QUALI FILTRES
SIEBEC Group

EN Data sheet

Prefiltration or clarification felt bag, assuring economical nominal filtration.

25% Recycled polypropylene

Food-grade polypropylene

PES

SANTOPRENE®

Description

QUALIPOCHE F bags are made from fibers that allow for decreasing porosity. The needle felt gives the bag a good retention capacity with minimal pressure drop. The surface of the felt retains coarse impurities and its internal structure ensures retention of finer particles.

The wide range of filter materials offers excellent chemical compatibility for a variety of industrial applications.

The bags are also available in a thicker version (PP and Polyester) which significantly increases performance and service life.

Characteristics & benefits

- Porosity wide range from 1 to 200 µm.
- Standard or custom bag.
- W shaped bag available enabling a 60% increase in filtration area.
- Wide range of filtration media : polypropylene (PP), polyester (PES), Nylon, polytetrafluoroethylene (PTFE).
- Thick felt design available for increased retention capacity and life span : PP and PES.
- External surface with thermal treatment to prevent leaching.
- Woven handle on the bags with retaining ring for a better grip.
- Complies with EU 1935/2004, EU 10/2011 and its amendments, EU 2023/2006 and complies with FDA regulations according to 21 CFR parts 177-1520 and 176-170 (in IW code).*
- Molded rings complete with integral lifting handles.
- Made from silicone-free materials.*
- Lot number on bags and packaging.

**Not applicable for recycled version*

Conditions of use

Max pressure loss	2,4 bar
Recommended replacement differential pressure	0,7 - 1,4 bar
Max flow rate	20 m³/h (size 10)

Chemical compatibility

	Polypropylene	Polyester	PTFE	Nomex®
Alkaline	+++	-	+++	+++
Acid	+++	+++	+++	+
Oxidizer	-	+++	+++	+
Solvent	+	++	+++	+++
Tmax (°C)	90	140	260	200

+++ Excellent | ++ Good | + Fair | - Not compatible

Note: displayed temperatures are only applicable for metal rings. If polypropylene ring, do not go above 90°C.

Product made from recycled materials

This product is part of our eco-friendly program (SIEBEC CSR), reflecting our commitment to environmental sustainability.

Incorporating PIR recycled plastic, it helps reduce our carbon footprint by nearly 100 tons per year while supporting a circular economy approach.

Made in France and designed with locally recycled materials.

*Non-FDA recycled version
